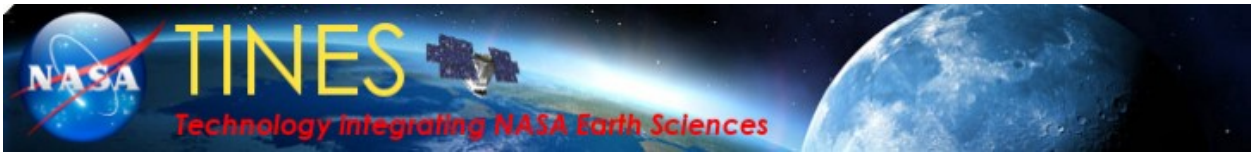
MOHAWK VALLEY COMMUNITY COLLEGE



USING NASA EARTH SYSTEMS SCIENCE RESOURCES IN THE CLASSROOM

A PROFESSIONAL DEVELOPMENT OPPORTUNITY
MOHAWK VALLEY COMMUNITY COLLEGE, UTICA, NY
AUGUST 18TH – 22ND, 2014

Dear K-12 Teacher,

Thank you for your interest in the NASA professional development program, August 18th – 22nd. We are planning an exciting 5 days at Mohawk Valley Community College in Utica, NY, with **meals & lodging provided.** We look forward to your participation!

Participants will become GLOBE certified and be registered with our cohort in the NSTA Learning Center. With the activities and experiences planned around using NASA Earth Systems Science resources we expect you will find this a rewarding experience!

Please fill in the attached application and **return it no later than May 30, 2014**. Space is limited and will be held on a first come basis.

Once the registration deadline has passed, registered applicants will receive a packet for review before the workshop. This will include an agenda and information about the location. Participants will be expected to become familiar with some background material before the workshop and there will be some follow-up during the upcoming school year. Participants will receive some great **free** material during the workshop and we will provide a small stipend of $50.00 to help with travel expense as well as $250.00 upon completion of all the workshop requirements. There is NO COST for this program – tuition is paid by a generous NASA grant! CEU's are available for this course for a nominal fee – call for details (315.792.5410).

Again, thank you for your interest and please feel free to contact us if we can provide any additional information or with any further questions.

Sincerely,

Deanna TeBockhorst
