U <b>LC12</b>	ED100- 12253 HS101- 11128	M Henningsen C Plescia	F, 11-1150 MWF 10-1050	Any students who require or choose HS101 and are new to the College
U <b>LC13</b>	CJ101- 16616 PY101- 11161	D Pasick M Adler	MWF 12-1250 MWF 11-1150	Any students who require or choose both CJ101 and PY101
R <b>LC14</b>	ED100-14007 MA045-16574/5	J Johnson B Rathbun	M, 14-1450 MTWRF, 13-1350	Any students who require dev math and are new to college

# **Fall 2012 Learning Communities**

## ***Double-Take: Re-envisioning Your World and Writing***

ED 100-CRN 13749 and EN 101—CRN 11385

Instructors: Sarah Beck & Tracy Coulson

This learning community emphasizes the skill of looking again: refining our goals as first-time college students and re-exploring our personal narratives and local surroundings in writing. By examining and raising questions about subjects, both familiar and unfamiliar, we will discover a wealth of concrete details and insights--the building blocks for strong writing. The integrated assignment for this class involves a local fieldtrip.

\*\*\*\*\*

## ***Writing for Success***

ED100-CRN13732 and EN099—CRN 11357

OR

ED100—CRN13739 and EN099—CRN11365

Instructors: Kimberly Palmiter & Erin Severs

This learning community will explore the connections between ED100 topics such as time-management, active reading and listening skills, note-taking, and study skills in the context of EN099. It will particularly focus on the application of these skills to improve your writing and contribute to success in all your classes.

\*\*\*\*\*

## ***EVERYDAY EINSTEINS***

ED100-CRN 11898 and MA045—CRN 15578 and 15579

Instructors: Patti Antanavige & Carla Zupancic

This learning community strives to connect math to real-life experiences. ED100 will place special emphasis on techniques for dealing with both math and test anxiety, in addition to building better study skills. There will be at least one integrative assignment where students will learn the importance of math in their everyday lives as both time managers and consumers.

\*\*\*\*\*

## ***GPS for Psychology!***

ED100—CRN12269 and PY101—CRN11736

Instructors: Dr. Robert Christman & Justin Rahn

Freud, Skinner, Wechsler, Bandura! Emotion, thoughts, idea, motivation! Astrology, numerology? Personality, normalcy? This can all be overwhelming! Get the roadmap of psychology and how to navigate it! Reach your destination!

\*\*\*\*\*

**Better, stronger, smarter!**

EN101 – CRN 11375 ED102 - CRN 17200 ED100 - CRN 14142

Instructors: David Nackley, Liz Doherty, Alicia Aiken

This Learning community is rooted in StrengthsQuest. All three classes will integrate StrengthsQuest into various assignments and classroom discussions. We live in a society that points out faults of the individual; this learning community focuses on teaching students how to utilize their strengths and understand their values to successfully achieve academic and personal goals. All three classes utilize various teaching methods such as visual aids, working in groups and individual assignments. Students will have the opportunity to explore their inner thoughts and emotions and create works based on their individual experiences.

.....

**You Will Use That Again**

ED100 + MA045—CRN 16574 & 16575

Instructors: Justin Johnson & Breanne Rathbun

This learning community serves to prove the value of mathematics both academically and practically. While MA045 covers a broad set of topics and their academic applications, ED100 focuses on several concepts from MA045 and places them in real-life contexts (such as time management and preparatory techniques)—lessons then reverberated through extensive use in MA045.

.....

**S.O.A.R.**

ED 100—CRN 14131 & MA 045—CRNs 17809 and 17810

Instructors: Susan Johnston & Maria Rivera

The S.O.A.R. learning community is committed to working with every student to provide a foundation of success. This includes academic achievement and intellectual experience. It will be accomplished through various avenues – lessons in basic math & financial management plus demonstration of effective communication, group work (collaboration) and writing skills.
