

## **Cabinet Summary October 9, 2018**

Present: all

### IT Plan

- Paul shared updates in the IT department and provided information on operational priorities.
- Paul encouraged Cabinet members to share the plan with their teams and solicit feedback.
- Randy asked for additional financial information for replacements for computer labs.

### Previous meeting summary - Jill

### Values moment

- Franca – medical issue in Rome Student Services (all four values!).

### Student Lunch Follow-up

- Alen suggested a new approach to introductions. Start with your why (I do the work I do).

### Stipend requests

- Discussed history of stipends and (lack of) process for awarding by collective bargaining unit.
- Generally speaking, stipends are not provided stipends for work covered as a result of a vacancy. More regular conversations with supervisors might alleviate such requests and assist with filling vacancies in a timelier manner so the work does not need to be assumed by another for a length of time. Also, if stipends are a consideration, time parameters need to be established.

Other on the fly as we ran out of time!
